

**Limited time special discount of AW3D DEM products,
 For the completion of AW3D 2.5m products global coverage**

NTT DATA and Remote Sensing Technology Center of Japan (RESTEC) started promoting AW3D Standard 2.5m products (DSM / DTM) in July, 2019. We now proudly announce that we have completed processing the full global coverage data last month.

This latest version of AW3D Standard, which offers 2.5m resolution for extra-detailed expression of cities and terrain, will be utilized for a wide variety of global applications.

We will offer a special limited-time promotion of AW3D Standard 2.5m products as well as AW3D Enhanced 0.5m products to celebrate the completion of 2.5m products.

Please take advantage of this promotion!
