

September 12th, 2022

Welcome to the latest edition of the AW3D newsletter.

AW3D team will be joining an upcoming conference-[Autodesk University 2022](#) (AU2022) in New Orleans, Louisiana, U.S. (27-29 September).

AU, hosted by Autodesk, is one of the largest digital design & engineering community events, and we are excited to be a part of this spectacular event.

-AW3D sales team

Join our session on Wednesday, September 28 at 3pm (CDT)!

Sami HARADA, a senior specialist and Mariko MORIOKA, a sales representative, from AW3D team, will host a class during the AU2022.

Date & Time: 28-Sep (WED) at 3 pm CDT (on-site)

Class Description: [CES501868 Leveraging Artificial Satellite Data in High-Low Mix Design Environment](#)

In this session, you will be able to:

- gain a basic understanding of GIS and satellite data
- discover GIS support functionality in Autodesk products
- discover web resources to access geospatial data
- learn the potential use of Autodesk products

Our class was selected out of over 2,000 applicants and already have 100 people registered for the course! If you are attending this event and have not registered yet, please do so as soon as possible.

For those who will not be attending this event, a recording will be made available to the public at later date.

We will keep you updated on the info through this newsletter, social media, and our website, so stay connected with us!

Meet us at our booth (#INF220) during the event!

AW3D team will also be participating in this event as an [exhibitor](#)- this is our first on-site exhibition in 3 years since the pandemic.

We will showcase our extensive range of AW3D products, solutions, and services.

We, AW3D sales team, look forward to meeting you at the booth!

Please visit our booth (#INF 220) to talk about anything and everything during the excited event!
